BUSINESS ECONOMICS, BACHELOR OF SCIENCE (724)

Program Coordinator

David M. Zimmer, david.zimmer@wku.edu

Economics is the study of how humans decide how to use the limited resources they have. Economic principles are at the core of decision-making by businesses, governments, non-profit organizations, individuals, and families, because the limited resources are not just money and raw materials – they are also time, attention, computing resources, food, water, hospital beds, or seats on a crowded subway. Economics is also a study of how individuals can create wealth though specialization and trade, as well as the role markets play in making this wealth creation possible.

The Business Economics major combines courses in economics with those in accounting, business data analytics, finance, management, and marketing. Data analysis is one of the core skills in economics, and the students in this major will have an opportunity to develop strong data skills that are highly valued by employers.

This combination of the economic way of thinking, core business competencies, and data-analytic skills prepares students for many different employment opportunities. Our graduates pursue careers in finance, banking, insurance, local and federal governments, public utilities, research institutions, education, and international organizations. They hold a wide variety of jobs such as economist, loan officer, forecast

analyst, financial analyst, business consultant, data analyst, energy analyst, bank examiner, research analyst, broker, market research analyst, policy analyst, professor, lawyer and many more. This multitude of possible career paths is what is great about choosing an economics major. Economics gives students an excellent foundation for employment in many areas of business and government service, as well as for advanced graduate studies.

Business Economics majors may also pursue the **Joint Undergraduate/ Master's Program**, an accelerated graduate program that allows students to start working toward their Master of Arts in Applied Economics while completing their Bachelor's degree. Undergraduate students admitted into JUMP may take graduate courses that will count toward BOTH undergraduate and graduate degrees which will significantly lower the cost of obtaining a Master's degree. For more information, visit the department website https://www.wku.edu/economics/

Program Requirements (72 hours)

A baccalaureate degree requires a minimum of 120 unduplicated semester hours. More information can be found at www.wku.edu/ registrar/degree_certification.php. (https://www.wku.edu/registrar/ degree_certification.php)

Students who began WKU in the Fall 2014 and thereafter should review the Colonnade requirements located at: https://www.wku.edu/ colonnade/colonnaderequirements.php. (https://www.wku.edu/ colonnade/colonnaderequirements.php)

The Business Economics major does not require an additional minor or major, but the structure of the program leaves enough room for students

to complete a minor or certificate, especially if that minor or certificate is in the Gordon Ford College of Business.

- * Or any calculus class, or math ACT score of at least 26, or math SAT score of at least 610.
- ¹ BA175 (1 hour) is only for Business LLC students. BA220 (3 hours) is only for WKU students and transfer students who choose a business major as a sophomore or higher.
- ² Some upper-level electives may satisfy Colonnade Connections requirements: ECON 375 is in the Social and Cultural category, and ECON 385 and ECON 430 are in the Local to Global category. Note, only one of these courses can be used to satisfy the Connections requirement - the rest must be taken from other disciplines.
